

**In the United States District Court  
for the Middle District of North Carolina  
Greensboro Division**

Defendant, Brian David Hill

v.

Criminal Action No. 1:13-cr-435-1

Plaintiff, United States of America

**EVIDENCE OF FIRST JOY STRICKLAND EMAIL PROVING  
PRIOR WARNING TO NC SBI AGENT RODNEY WHITE ON  
DEFENDANT'S INNOCENCE**

Comes NOW, the Defendant Brian D. Hill files with the Honorable Court the entire Joy Strickland email with Attachments included as Exhibits proving to The Court that prior warning was given to North Carolina State Bureau of Investigation Special Agent Rodney White on the Defendant's possible innocence prior to being arrested by the Department of Homeland Security. Brian was willing to speak with Agent White regarding the computer virus or Trojan horse on his computer so that he can locate the hacker's unauthorized program which would have proven the defendant's claim to be true. All of this could have prevented the indictment and arrest of the Defendant as there would have been a further investigation into whether or not the child porn was placed on the Defendant's computer by a computer hacker. That would prove the Defendant didn't have control over what could be downloaded onto his computer as a computer hacker uses computer viruses to conduct illegal activities while the target computer gets raided to be the fall computer, while the hacker can get away with the crime.

It has been stated on court record already that Agent White admitted to receiving

the email forwards from Joy Strickland as Brian had requested, which was witnessed by a U.S. Marshal on the day of arraignment at the L. Richardson Preyer Federal Building and U.S. Courthouse, which houses the Greensboro Division of the U.S. District Court. So the Marshal had witnessed that Agent White admitted to have received Brian's emails prior to his arrest. This email is one of four emails sent to Joy Strickland prior to the arrest of him.

Question is if the SBI had been warned about the potential Innocence of the Defendant at the time then why continue to go through with the indictment?

The second question is that Susan Basko (See Doc# 46, Filed 09/30/14, and Doc# 32, Filed 09/15/14) warned the U.S. Assistant Attorney Anand Prakash

Ramaswamy of the Defendant being framed with child pornography prior to the change of plea hearing and prior to the mental evaluation. Even Document 37 (See Doc# 37, Filed 9/18/14) proves that a Fax was sent to the U.S. Attorney Office warning about a possible set up, prior to the arrest of the Defendant.

So the U.S. Attorney was warned ahead of time of the frame up on the Defendant Brian David Hill but yet still tried to offer a guilty plea agreement which caused the conviction of him. If Brian does have the evidence to prove Innocence such as with a Independent computer forensic examination (See Doc# 76, Filed 04/22/15), then a plea agreement would not have been appropriate and the public defender should have filed a Pretrial Motion for such examination to exonerate and acquit the Defendant. The public defender did nothing to submit any evidence to prove multiple reasonable doubts which the Defendant was able to prove by filing Pro Se Motions and misc. filings. No jury will convict a Defendant that keeps claiming

over and over again that he is Innocent and can prove his computer was hijacked by a computer hacker by usage of a computer virus or Trojan horse. Then he was also able to prove that prior to former District Attorney Phil Berger Jr. being involved with the search warrant and child pornography case, he was writing online articles postings on his website calling for the DA's father State Senator Phil Berger Sr. to be removed from office and calling him a traitor, he has written emails which made the Senator look like he doesn't care about the Constitution by ignoring all of the Defendant's emails after the July 9, 2012 town council meeting, and that Phil Berger is the Mayodan town attorney which would give him unrestricted influence on it's Police Department which conducted the search warrant, raid, and child pornography investigation along with Reidsville Police Detective Robert Bridge and SBI Agent Rodney White. With the evidence that the Defendant has of possible conflict of interest on those involved in the criminal investigation in 2012, would a Jury really convict a Defendant that has no prior record, get involved in politics, started coming after the State Senator by wanting him removed from office and fired from the Mayodan town government, and then all of the sudden was accused of downloading child pornography right after he was kicked out of the town council and written a online posting plus uploaded a video on YouTube regarding the incident. With enough evidence in the defendant's possession, why wasn't any of this presented by public Defender Eric David Placke? Why didn't Placke discover any new evidence nor conduct any investigations to discover new evidence in favor of the defense? The public defender only sought for his guilty plea. Placke had no interest in acquitting him on

any technicality of law nor any evidence which would prove multiple reasonable doubts. Placke could have easily proven actual innocence by proving that a computer virus had ran on his computer during the time of being accused of committing the alleged offense. Placke could have very well brought this evidence to the attention of Dr. Dawn Graney which would cause a different outcome in her mental evaluation report. Had Placke done his job then the Defendant never would have made any admissions of guilt, never would have accepted responsibility, and never would have been convicted. The outcome of the criminal case would have been different had effective counsel been appointed instead of an overburdened public defender that doesn't have the time nor resources to adequately represent the Defendant. The Criminal Justice Act needs to be reformed to fix the broken public defender office to safeguard every Defendant's right to Effective counsel under the Sixth Amendment to the U.S. Constitution.

Evidence of the first Joy Strickland emails is separated into Exhibits.

- Exhibit A. Joy Strickland email sent from Brian D. Hill ([admin@uswgo.com](mailto:admin@uswgo.com)) to NC DOJ Employee Joy Strickland ([JStrickland@ncdoj.gov](mailto:JStrickland@ncdoj.gov)).
- Exhibit B. Attachment A - Search Warrant against Brian D. Hill scans
- Exhibit C. Attachment B - Police inventory of seizure of Items of Brian D. Hill pursuant to search warrant
- Exhibit D. Attachment C - Reporter intimidated and booted from town council when asking a question & YouTube Video on Mayodan Police escorting me out of town council
- Exhibit E. Attachment D - General Affidavit From Brian David Hill(witness testimony and statement of facts)

Exhibit F. Attachment E - Welcome! Here's Your Registration Confirmation\_Password Redacted – Match.com email

Exhibit G. Attachment F - USWGO Mail - You better watch out..... threatening email

Exhibit H. Attachment G - USWGO Mail - Your gonna get it threatening email

The Defendant understands part of this email was already filed on docket but is not the entire email including all attachments to that very email. This evidence filing is to file the entire email on court record for review.

Respectfully submitted,

A handwritten signature in black ink that reads "Brian D. Hill". The signature is written in a cursive style. Below the signature, the word "Signed" is written in a smaller, simpler font.

Brian D. Hill ( pro se )

Dear  
Joy Strickland  
Assistant Attorney General  
Law Enforcement Liaison Section  
North Carolina Department of Justice  
[919-662-4509 ext. 4400](tel:919-662-4509)

I am now aware after contacting the SBI Office, that I am under investigation by the Greensboro, NC SBI Office, under Agent Rodney White. I like for you to keep a record of this email for your records and send a carbon copy to SBI Agent Rodney White. You may even share this with the Attorney General if you feel it is appropriate. I am even willing to supply the appropriate affidavits if required. My family also are witnesses and are willing to produce affidavits then notarize them then send them to your office if necessary.

I am representing myself pro se until I can either afford a lawyer, am appointed a lawyer, or one decides to help me pro bono. My only source of income is Supplemental Disability Income (SSI) from Social Security, getting medical help from Medicaid, and food assistance from EBT. I have type 1 brittle diabetes and mild autism. I thought this is something the investigator should be aware of. I have all the medical records proving this and one of my former doctors was Dr. Steven South of Greensboro NC, and the patient record I am citing is Brian David Hill, born on May 26 1990.

I like to introduce evidence in my case that helps prove my innocence claims on the day of the police raid (Attachment A) to the Mayodan Police. During the raid I told the chief of police of Mayodan that it was a Trojan horse that I believe was the cause behind what caused the raid. I may have told the detectives about this as well but I cannot remember as it was 15 months ago since the incident. I received a Inventory (Attachment B) of all my property that was seized. Due to being threatened by either the police chief or detective sergeant saying things to me and my mother, and grandparents like "Fess Up!!!! We know you did it!!!! You better fess up or else your mother will be held responsible." Also I was being intimidated by the police chief on writing a hobby blog news article (Attachment C(2)) about how he kicked me out of the town council, after telling me "This is Serious!!!" and was scaring me then accused me of slandering him on my news website, which is why I didn't defend myself verbally when I was falsely accused of slandering the chief, cause I was afraid of him. He was also angry due to a YouTube video (Attachment C) that I had uploaded showing me confronting the state senator with a camera to ask him questions as a news reporter, and was escorted out by the police chief which the video shows, then intimidated and threatened me in the town municipal lobby when my camera was turned off. After that incident on July 9th 2012 I was under criminal investigation for possible child porn downloading and distribution.

Something the SBI needs to also investigate was a finder binder that happened around anywhere between July and August 2012. The driver on record was Roberta Ruth Hill my mother. She was on GMAC insurance at the time, and the Mayodan Police intervened to take the case even though the incident happened on private property located in Madison, NC. Of course all information due to the finder binder I believe was used in the search warrant. I had long suspected that the finder binder was foul play to further punish us for me writing that article about the possibly corrupt police chief and gather information for the search warrant but proving it is difficult. I had tried to get a former insurance fraud investigator to dig up all insurance records on Roberta Hill including possible police reports that the insurance provider had likely acquired regarding the finder binder to see if the person that made the claim and wanted my mom's insurance information was in any way connected to the police or District Attorney in any way which would be probable cause to initiate a FBI or SBI investigation into the matter to interrogate the finder binder claimant to see if she was paid money or given any favors by the Mayodan police detective or Reidsville police detective to cause the incident to gather enough information for the search warrant affidavit. Also my IP Address was manually entered into the Boca Raton, Florida-Based "Child Protection System" and not automatically flagged as the search warrant said, which I discovered from the investigative news reporter that is looking into my case.

I am also presenting a unsigned and non-notarized affidavit (Attachment D) which I will be happy to sign and notarize if required by the SBI/DOJ. It is my witness testimony on a Trojan horse that got on my computer mysteriously and started running rogue copies of P2P applications and sharing possibly unlawful data without my knowledge nor consent. I did however discover the files this Trojan horse was sharing by opening the folder location using the Windows 7 task manager. While the Trojan horse was hacking my computer, I think I had external hard drives connected which the hacker may have also compromised during the incident. I had no idea what it was sharing or doing that was in any way illegal until the raid and the ICAC task force got involved until the day of the police raid which is why I panicked a bit then tried to explain to the police about the Trojan horse.

Due to the threat, coercion, and intimidation coming out of the Mayodan Police Department, I confessed falsely to the two detectives on August 29th 2012. I was shaken up to the point where I didn't just make a false confession but signed the documents without really reading and understanding them. Also during the interrogation that was unannounced, I was separated from my mother then interviewed by Robert Bridge and Todd Brim. I was interrogated I think close to around lunch time and I have type 1 brittle diabetes and the detectives never checked my blood sugar before, during, nor even after the interrogation which would severely affect a quality interrogation, putting me under significant stress which would produce false confessions. I also did not have any glucose tablets nor any insulin with me at the police station. I am also mildly autistic so I can repeat stuff from other people including stuff from the search warrant. There was a study I am citing that I need to find again then send to you that autistic people can falsely confess to crimes due to an authority figure or a so called them being the autistic person's friend. I was not given any advocate during my interrogation and was being asked political questions (Agenda 21 and I think NDAA) at the beginning from what I remember and at the end they asked if I belong to a cop killing group called the Sovereign Citizens due to the detectives finding a "Don't Tread on Me" Gadsden flag on my computer. Of course the flag does not mean that I in any way, shape, or form are connected to the Sovereign Citizens group. Because of the ridiculousness of the claim by the detective, I ended up having to send an email inquiry to a random Sovereign Citizens group asking if I belong to them to gather evidence that I am not which they never responded to cause it sounded ridiculous since I never belonged to any Sovereign Citizen group in the first place. The only political groups I had any affiliation with in 2012 was PANDA which is People Against the NDAA, We Are Change NC, Planet Infowars social networking site, The Patriot Coalition or at least not a member but working with it's founder, and I had contacts with Infowars. Also of course I founded and ran USWGO Alternative News which I had shut down after the police raid as a precaution, scared that keeping the site up would incite criminal charges. I also had shut down USWGO Alternative News during the Righthaven lawsuit fiasco. I did revive the website which has been documented by the NYTimes article on me and the lawsuit. As of now USWGO Alternative News is shut down and has been since the raid.

During the raid the police falsely accused me of having illegal drugs due to Ink Refuel kit syringes and insulin syringes for my diabetes. They falsely accused me of having a bomb in my safe due to my three DVD cases being wrapped in Aluminum foil. The reason it was wrapped was an attempt to create a poor mans Faraday cage to protect my DVDs from possible EMP attacks from nukes that could come from Iran or any other country. The police falsely accused me of owning firearms which I had none of. I can also present to your office an affidavit of how the police treated me, my mother, and my grandparents during the police raid and the day after. The way the police treated me violated my civil liberties and right to watch what the police were doing. I was kept out my own home for 3 or more hours, was not even allowed to make a phone call, any cell phones we could use would be confiscated as evidence, and me and my family were forced to stand or sit outside our home for the entire time. I could not even grab a notepad to take notes on what the police were doing. They could have planted files on me and I would have no proof of this, and since the economy is bad no police officer will defend me since they are getting a paycheck every month from them, because I simply made an enemy of the police chief of Mayodan, the same PD that conducted the raid.

Also the police admitted to examining one or more computers and possibly hard drives prior to sending off to forensics. The police detectives are not forensics experts nor do they have a controlled facility to properly conduct the proper computer and hard drive forensics, otherwise there would be no need to send to the state crime lab. There were no SBI Agents present during the police raid and during the interrogations. The only time the SBI got ever involved was examination of my stuff and forwarding a request for a administrative subpoena and that seems to be it from all information I can get from different employees of the state government and search warrant. The detectives could have planted evidence since they had access to our property before the crime labs and of course if they aren't forensics experts then they could have contaminated the property evidence before being sent off to the Triad crime lab. The search warrant has contradictions, and my criminologist friend told me after examining the affidavits that the detectives admitted to watching child porn the way they worded it and said it almost sounds like a

## Re: email inquiry

confession or expert testimony document. You can ask me for her testimony on examining the search warrant affidavit and I can give you her email and/or phone number to get the information.

### Statement of Facts regarding my life since the raid

Due to my autism, I ain't very social and did not leave the house a lot in Mayodan. I was getting more social when I was getting into political activism and trying to be a Alternative and professional news reporter. I now live in the state of Virginia and have a online dating profile at [match.com](#) (Attachment E), and have a membership at the YMCA. I have improved my own self and improved my lifestyle, I have stayed out of politics with the exception of my case and also tried to stay out of trouble, but the fact I could still be indicted scares the hell out of me and makes me want to kill myself. My mom has documented that as a result of the criminal investigation, At one point I kept saying and even typing that I was going to kill myself, and so my family had to keep intervening me to not do it. Of course as of now I am fine and that is why I have decided to send this email to both the Law Enforcement Liaison and to the SBI so that I can defend myself while I still have open access to all the evidence that proves my innocence, since I won't be able to have access to my defense evidence while sitting in a detention facility while awaiting trial. The police raid and SBI criminal investigation is keeping me from moving forward and trying to live a better life. I even attempted to see a counselor but didn't really keep with my major mental health issue so I had quit. This criminal investigation just seems to be ongoing and I feel like I can't move forward until things are settled. That is why I wish to give the SBI my side of the story, evidence I have in my possession which I believe can help prove my innocence. That way I can move on and try to live a better life.

I have never harmed a child ever, and I never will, and that is a fact.

When I was a teen, I was concerned over a girl named Rachel Ashcraft that was one year younger than me at the time I was 16 years old, that was talking to a possible pedophile and had reported the incident to the FBI. One of her pictures is on my flash drive that the police seized. So it ain't some random girl photo that I have, it was someone I had cared about when I was a teen, and tried to help give me advice in my life to help me change my life to become more social even though I have autism and had trouble with being social back then.

I haven't even been around children, and never babysit. The only crime I am accused of is a digital crime due to a Trojan horse that was likely the culprit. I have also been heavily political and made a lot of enemies. I can list to you the enemies that were coming after me when I ran USWGO Alternative News, and have the motive to set me up with child porn. In the political world there is a lot of backstabbing and I had been repeatedly back-stabbed politically and personally by those seeking to come after me.

I may also have a girlfriend but when I had found out the SBI was investigating me, I told her and she started panicking begging me to go to the media but I was afraid that would stir up a hornets nest. She knows what I am accused of, a computer crime that I ain't guilty of, and she still likes me and still wants to date me. If I get put on the sex offender registry then this will negatively affect her life and punish her just for dating me, hurt my life, and ruin my life. I live in a Apartment not too far from Martinsville downtown and being put on the sex offender registry will ruin my right to live in a Apartment due to the zoning restrictions for sex offenders, I will face major discrimination, and I will be at risk of being targeted by vigilantes that burn down houses of possible sex offenders. I did nothing to children, nothing to deserve ever risking to being put on a sex offender registry and I will refuse to register since I have done nothing wrong that warrants this. My life has been better since I moved to the Commonwealth of Virginia and do not want my life to be ruined by all of this in North Carolina.

### Threats were sent to me after the raid

I have been sent multiple threats since the raid. The threats came from a [tormail.org](#) account and told me to stop investigating the matter and watch my back, even claimed to be the possible perpetrators for setting me up with child porn. I was afraid reporting the threat would stir up a hornets nest or cause them to harm or kill me so I had kept it to myself, but now have decided to report the threats to the Law Enforcement Liaison and SBI agency so that they can try to investigate, and find out who may have possibly set me up enough to brag about it and threaten me. I was afraid that reporting the threats would make them carry out setting me up as a violent sex offender or worse set up my friends. Now I have decided since I am being investigated and this madness won't stop, that I have decided to risk my life and risk my safety by reporting the threats now to the SBI. I thought if I stop trying to investigate my set up then I will become a registered sex offender and my life will be ruined so I ignored the threats and then my friends Dan Johnson and Jeff Lewis received threats then Luke Rudkowski was announcing on YouTube that someone attempted to use a tormail account to set him up with child porn. I started freaking out thinking that this was whomever set me up that the threats against me were being carried out, then when it went as far as Stewart Rhodes, I sent an email to the suspected tormail address published on Oathkeepers.org on an article about the set up, begging them to stop setting people up and that I would make more false confessions to the police to get myself more falsely punished to beg them to stop what they were doing, then I received a email from a fake Jeff Lewis on a tormail account. He (the real Jeff Lewis) informed me that was not his email address and had Garrett from PANDA a forensics analyzer look at my email after giving him my gmail username and password, allowing him to examine the tormail email which was indeed another set up attempt on me and first set up attempt made on Jeff from the Patriot Coalition. I heard that email was reported to the FBI on record thanks to Garrett. Attachments F and G document the threats. I also included in attachments F(2) and G(2) the header information of the emails for your records.

### Final words from me

I hope by writing this email that I will not be completely set up with child porn as what was being planned by the prosecutor to have me charged or indicted. I had done nothing to deserve all of this. It makes me angry and also scared not knowing what to do. This was the first time I was ever accused of any crime. I have always tried to do right in the world, in America, and even in my community. I have autism, I am different, unique, but I am not a monster, I am not a predator, and will never attempt to be one. That is my word to the SBI. I don't want to be falsely accused anymore and hopes all the evidence I am sending will help clear my name from all of this.

I have sentimental and completely legal data that I may lose forever as a result of the investigation and the raid. I have independent and personal news interviews such as interviews with Eiton M. Crisman Jr. a former NASA engineer, James P. Tucker a now deceased news reporter from the American Free Press, Virgil H. Goode a Virginia candidate running for US Presidency in 2012 Patrick Henry Jolly a historical figure whom is the fifth or sixth grandson of the Patrick Henry in American history, Oath Keepers at Chantilly VA the site of Bilderberg, and other great people I took video of and interviewed. All of those interview files are on the seized hard drives. I have literally tons of hobby photos that were never in any, way, shape, or form pornographic. Those hooby photos and videos include photos of the Occupy Bilderberg protest, Pilot Mountain, hanging Rock, Key West Fl, Washington DC, New Bern, Fort Macon, Outer Banks, Richmond Virginia capitol, out west which include Las Vegas and Zion National Park, Mayo River, Mayodan town council and accomplishments there, Washington Mills factory in Mayodan that is being deconstructed, train tracks that I thought was cool, and possibly hundreds more of completely legal photo sets from every vacation trip I have ever taken since I was a teenager including photos of my pets that I had loved which are also now deceased. I also have audio feeds as well as photos of me and people I have interviewed, even people that interviewed me which is WX112 and FOX8 when being interviewed over my Righthaven lawsuit (Righthaven LLC v. Brian D. Hill, Federal US Case Colorado). I am hoping one day I can have my completely legal data returned to me since legal data is not contraband. I hope I won't lose everything as a result of all this. I don't deserve to lose all my hobby photos, interviews, and other stuff over a few bad files due to a stupid Trojan Horse.

A hard drive is the same as a house, because a burglar (Trojan horse, hackers) breaks into my house and starts molesting some women and then takes photos then plants them inside of my house, does that mean my whole house should be seized then forfeited, that all of my legal possessions inside the house be seized then forfeited????????? Only contraband should be taken but not the lawful data. Being a victim of a criminal act that is in violation of the federal Computer Fraud and Abuse Act does not mean that I should become a convict then have all my lawful stuff forfeited. Such actions is not justice and is in itself Orwellian, in violation of the principles of the Constitution and due process clause.

So I ask that all evidence I have sent you be considered and taken into consideration in this criminal investigation under SBI file. If you wish to interview me then I will be glad to do so and help the criminal investigator sort all this out. I am not a predator trying to get away with a crime, I am a victim of a possible frame up or set up operation. I am hoping the SBI has the integrity and ability to make things right for me, to go after the real criminal behind all this instead of just settling for me. I also made an inquiry with the NC Innocence Inquiry Commission to see if they could go do something to audit the Rockingham Co. DA office, Mayodan PD, Reidsville PD, and the Greensboro office to make sure that I ain't being set up from within, but refused to help me since I haven't been convicted nor charged. If you or the SBI agent in charge can help me out, to help look at all angles of the evidence, without bias, to see if there was foul play by the Mayodan PD or any others involved in my case, and to help find prove my innocence.

All attachments are attached to this email. My phone number and address was not included in this email as my family is scared to death of this investigation being a result of me being political and is afraid anything I do will stir up a hornets nest. I like to be the only one talking to you at this point so that you can reassure me and talk to my family at some point to let them know that I am not going to be dragged into some van then disappeared just for trying to prove my innocence. I don't know what else to do and can't get a lawyer till I am charged so I thought my only options were to give any evidence I had to the investigator in my case. To try to prove that I am innocent and not a predator. I am trying to be as reasonable as I can and hope that I will not have my life ruined forever due to writing articles last year.

**From:** Brian Hill [mailto:[admin@uswgo.com](mailto:admin@uswgo.com)]  
**Sent:** Tuesday, December 03, 2013 9:58 AM  
**To:** Strickland, Joy  
**Subject:** Re: email inquiry

Dear Joy Strickland,

The problem is that attorney was only hired to write the letter to the Mayodan Police Department regarding seizure of my property, and to mirror their response back to me. As of right now I do not have an attorney and can only get one that will offer services cheap or pro bono. Another reason an attorney has not decided to help me at this point without charging an arm and a leg is because there really doesn't seem to be any kind of case against me but yet my property is still being held by Charles J. Caruso and Todd Brim of the Mayodan Police Department, and Robert Bridge of the Reidsville Police Department. He told the attorney that sent the letter, that my property is still being examined by the SBI. I have contacted different people that has told me they have no record or any information as to whether my stuff is even being held at the state crime lab under the SBI. I am getting the impression that the police chief is lying to me knowing I can't get any information nor an attorney until I am criminally charged as I cannot be appointed one until then, and if I am never charged then my stuff was stolen by the MPD under false pretenses. I am confused as to whether there is really any kind of criminal investigation or even forensics on my property. Ever since the raid the whole investigation is unusual and unlike that of regular law enforcement that follows regular criminal procedure. The amount of mixed responses I am getting is why no attorney wishes to represent me pro bono is because there really isn't any case to represent me on except maybe return of seized property but I need evidence that they do not intent to look for evidence on my seized property as for cause why a court should grant my motion to demand the MPD returns my property. Until I have a clear case to need one, I cannot afford an attorney not will one help me pro bono.

I am living off of social security disability income (SSI) and Medicaid. So at this point information is what I need before an attorney will agree to just help me.

If there is no case then I like to at least know if my stuff is being at least examined in the crime lab so that I at least have knowledge as to what is going on, otherwise I may be a victim of theft by law enforcement that produced a falsified search warrant(already contradictions and the affidavit may not be true) just to seize my stuff and pretend that it is being examined on when it isn't. All I can come up with is theories and theories aren't accepted by any attorney or a court. I need to know what are the facts as of now. If my stuff isn't being examined then I need proof of it being so, so that I can file a motion for return of seized property since the seized property is not being even being examined in the first place.

I am hoping you can help me with my confusion on the situation. I have a lot of important sentimental data that is completely legal that was in the seized belongings such as the out west trip pictures, a independent video interview I did with a historical figure, hobby photos, hobby videos, and even documents that are of significant importance. I am afraid the police may have just seized it to use as if it was their own property. I contacted the US Attorney as Angel Gray insisted but they aren't giving any responses either even though the chief of police made some form of a federal indictment threat which isn't being backed up. I don't even think I'm being criminally charged and the whole raid was a joke just to hurt me.

I am hoping you can explain to me what exactly is going on here. Is the SBI really examining my stuff? are they really investigating me? Is there even a record that the Mayodan or Reidsville Police Department really sent my stuff to the state crime lab for examination? and whether they are aware that my stuff was already independently examined by the two detectives that possibly contaminated and destroyed possible evidence and may or may not have even sent it to the state crime labs?

The property was seized at the location: 413 N. 2nd ave. Mayodan, NC 27027

The IP Address that the detectives claimed was flagged automatically was not automatically flagged but manually entered at the Florida server according to what a investigative source told me so that would make the search warrant a perjury.

My name is Brian David Hill. I had previously lived in North Carolina under that location.

If I am under investigation then I like to at least know that I am so that I ain't confused as to what is going on. I feel like something throughout the whole raid process isn't legal and have at least enough evidence that something isn't right, that something isn't legal what happened to me. That is why I am contacting you and different people asking for answers.

I had pondered going to the FBI since I cannot afford an attorney to find out the truth then give me back my possibly stolen property. I had pondered going to the Attorney General to right the wrongs done to me by the MPD. I know I am writing a confusing email but I am entirely confused about all this. If you can help me that will be great.

ATTACHMENT A

ITEMS TO BE SEIZED

The following materials which constitute evidence of the commission of a criminal offense; or contraband, the fruits of crime, or property designed or intended for use or which is or has been used as the means of committing a criminal offense, namely a violation of NCGS 14-190.17:

1. Computers and computer related storage media including, but not limited to, hard drives, thumb drives, CDs, DVDs, floppy disks, flash media, memory sticks, iPods, PDAs (Personal Digital Assistant), cell phones and any other mobile wireless devices, and other magnetic, digital, and/or optical recording media.
2. Records evidencing use or moderation of a Gnutella P2P network including, but not limited to, screen names, filenames, digital pictures, dates/times of posted images,
3. IP connection information related to the postings.
4. Graphic and movie files (including, but not limited to, files bearing file extensions .JPG, .GIF, .TIF, .AVI, .MPG, and WMV,), and the data within the aforesaid objects relating to said materials, which may be, or are, used to visually depict child pornography or child erotica.
5. Computer programs capable of viewing graphic files.
6. Text files containing information pertaining to the interest in child pornography or sexual activity with children and/or pertaining to the production, trafficking in, or possession of child pornography.
7. Correspondence, including, but not limited to, electronic mail, chat logs, and electronic messages, pertaining to the trafficking in, production of, or possession of visual depictions of minors engaged in sexually explicit conduct, as defined in NCGS 14-190.17.
8. Correspondence including, but not limited to electronic mail, chat logs, electronic messages, soliciting minors to engage in sexually explicit conduct for the purposes of committing an unlawful sex act and/or producing child pornography.
9. Any child pornography in any form including, but not limited to, photographs, magazines, photocopies of photographs, videocassette tapes, and computer text or images.
10. Names and addresses of minors visually depicted while engaged in sexually explicit conduct.
11. Files depicting sexual conduct, whether between adults or between adults and minors.
12. Any book, magazine, periodical, film, videotape, computer disk, or any other material that contains an image of child pornography.
13. Any and all documents and records pertaining to the purchase of color photographs or the purchase of any child pornography.
14. Notations of any password that may control access to a computer operating system or individual computer files. Evidence of payment for child pornography, including but not limited to: cancelled checks, money order receipts, or a debit entry in a computer software finance program or credit card statement.
15. Computers, keyboards, tapes, cassettes, cartridges, streaming tape, commercial software and hardware, computer disks, disks drives, monitors, computer printers, modems, tape drives, disk applications programs, data disks, system disk operating systems, magnetic media floppy disks, Secure Digital Disks, USB Drives, digital cameras, hardware and software operating manuals, tape systems and hard drive.

Attachment C

AFFIDAVIT IN SUPPORT OF SEARCH WARRANT

I, Todd Brim, (YOUR AFFIANT) being duly sworn, do hereby depose and say:

**BACKGROUND ON AFFIANT: Todd Brim, Mayodan Police Detective Sergeant employment, educational and training background is as follows:**

1. I (YOUR AFFIANT) received my Basic Law Enforcement Training Certificate (BLET) in 1995. While in BLET, I received the highest grade point average in my class. I was hired as a Police Officer for the Town of Mayodan, NC in 1995. I was assigned as a patrol officer, where I conducted investigations into automobile accidents, misdemeanor larcenies, and minor drug possessions. In 1998, your affiant was promoted to the Criminal Investigations unit as a Criminal Detective. Your affiant has taken several courses from the North Carolina Justice Academy including Interview and Interrogation, Police Law Institute, and Basic Cyber Crimes Investigations. I have successfully completed the North Carolina Justice Academy's Criminal Investigation Certificate Program and I have obtained my Advanced Law Enforcement Certificate.
2. I, Todd Brim, have previously written affidavits for search warrants in cases involving various crimes committed in the Town.
3. This affidavit is made in support of an affidavit for a search warrant to search the premises and computer equipment of the residence (413 N 2<sup>nd</sup> Ave, Mayodan, North Carolina, ), person, and vehicles of Roberta Hill W/F DOB: 05/14/1967 NC OLN: 8867196 and Brian David Hill W/M DOB: 5/26/1990 NC OLN: 38360908 and/or any other person at the residence of at 413 N 2<sup>nd</sup> Ave. to include any vehicles located at that address: specifically registered to Roberta Hill and that are associated with the home specifically a 2000 Pontiac Sunfire Plate# PWA6942. Records indicate that Roberta Hill is the occupant and Brian David Hill is known by police officers to live at this residence. Records also indicate that Roberta Hill has a subscription and service for Time Warner Cable Internet Service at that address that matches the IP addresses where child pornography has been captured during this investigation.

**OVERVIEW OF PROBABLE CAUSE**

4. The information contained within this affidavit is based upon information your affiant has gained from my investigation, personal observations, training and experience, and/or information related to your affiant by other law enforcement officers and/or agents. Since this affidavit is being submitted for the limited purpose of assisting in securing a search warrant, your affiant has not included each and every fact known to me concerning this investigation. Your affiant has set forth the facts believed to be necessary to establish probable cause to believe that evidence of violations of North Carolina G.S. 14-190.17, second degree sexual exploitation of a minor, will be found on the premises, and on the computers and/or electronic storage media located on the premises.

5. On Wednesday, August 22, 2012 at 1400 hours, Reidsville Police Detective Robert Bridge contacted me in reference to a child pornography case in the Town of Mayodan, North Carolina. According to Detective Bridge, he discovered that an IP address registered to Roberta Hill was being used to download and view child pornography. Detective Bridge is a member of the Internet Crimes Against Children (ICAC) Task Force. He has received training and resources to successfully investigate cybercrimes involving child pornography.
6. Detective Bridge requested that I confirm that no other "Wi-Fi" signals were in the area of the Hill residence, located at 413 North 2<sup>nd</sup> Avenue in Mayodan, North Carolina. Furthermore, he requested that we confirm any known occupants of the residence. Through my knowledge and previous experience, I know the residence is occupied by Roberta Hill and her son, Brian D. Hill. I drove to the residence and confirmed that no unsecured "Wi-Fi" signals were present at the time of this affidavit. I also checked the utilities and confirmed that Roberta Hill resides and the aforementioned address.

Attachment D

AFFIDAVIT IN SUPPORT OF SEARCH WARRANT

I, Robert W Bridge, (YOUR AFFIANT) being duly sworn, do hereby depose and say:

**BACKGROUND ON AFFIANT: Robert W Bridge, Reidsville Police Detective employment, educational and training background is as follows:**

- 7. I (YOUR AFFIANT) Received my Basic Law Enforcement Training Certificate (BLET) in 2008. While in BLET I received the highest grade point average in my class. I graduated from Rockingham Community College with honors with an Associate in Applied Science in Criminal Justice Technology. I am currently attending Guilford College studying Computer Technology Information Systems. I was hired as a Police Officer for the City Of Reidsville, NC in 2009. I was assigned as a patrol officer where I conducted investigations into automobile accidents misdemeanor larcenies, and minor drug possessions. In 2011 your affiant was promoted to the Criminal Investigations unit as the Juvenile Detective. I also was given a position on the North Carolina Internet Crimes against Children task force. As part of that task force your affiant has completed 110 hours of training in internet related investigations including basic undercover internet investigations, peer to peer file sharing undercover investigations, wireless network investigations, craigslist investigations and computer triages. Your affiant has also taken several courses from the North Carolina Justice Academy including Interview and Interrogation, Police Law Institute, and Child about Related Interviewing: The Suspected Predator.
- 8. I, Robert Bridge, have previously written affidavits for search warrants in cases involving crimes against children, child exploitation, Internet crimes against children and cases arising out of various on-line undercover in crimes against children, as well as all other facets of criminal investigations.
- 9. This affidavit is made in support of an affidavit for a search warrant to search the premises and computer equipment of the residence (413 N 2<sup>nd</sup> Ave, Mayodan, North Carolina, ), person, and vehicles of Roberta Hill W/F DOB: 05/14/1967 NC OLN: 8867196 and Brian David Hill W/M DOB: 5/26/1990 NC OLN: 38360908 and/or any other person at the residence of at 413 N 2<sup>nd</sup> Ave. to include any vehicles located at that address: specifically registered to Roberta Hill and that are associated with the home specifically a 2000 Pontiac Sunfire Plate# PWA6942. Records indicate that Roberta Hill is the occupant and Brian David Hill is known by police officers to live at this residence. Records also indicate that Roberta Hill has a subscription and service for Time Warner Cable Internet Service at that address that matches the IP addresses where child pornography has been captured during this investigation.

**OVERVIEW OF PROBABLE CAUSE**

- 10. The information contained within this affidavit is based upon information your affiant has gained from my investigation, personal observations, training and experience, and/or information related to your affiant by other law enforcement officers and/or agents. Since this affidavit is being submitted for the limited purpose of assisting in securing a search warrant, your affiant has not

  
 Signature: Judicial Official/Date

  
 Signature: Law Enforcement/Date

\_\_\_\_\_  
 Additional Affiant: Signature/Date

  
 Additional Affiant: Signature/Date

included each and every fact known to me concerning this investigation. Your affiant has set forth the facts believed to be necessary to establish probable cause to believe that evidence of violations of North Carolina G.S. 14-190.17, second degree sexual exploitation of a minor, will be found on the premises, and on the computers and/or electronic storage media located on the premises. Specifically this affidavit will show the scope and nature of how the IP addresses (24.148.156.211) assigned to 413 2<sup>nd</sup> Ave, Mayodan NC, the home of of Roberta Hill W/F DOB: 05/14/1967 NC OLN: 8867196 and Brian David Hill W/M DOB: 5/26/1990 NC OLN: 38360908, was located and identified in an ongoing undercover investigation into child pornography trading on the Internet. It will show how automated tools used in that undercover process recorded the IP address sharing child pornography and how automated undercover tools were used to get a list of files on the computer at that IP address and to download some of the offered child pornography. It will show how that child pornography is known to be illegal in North Carolina. It will describe the scope and breadth of the undercover operation and how it relates specifically to this IP address and address. It will show that I made a direct connection to the computer at that IP address and received a listing of files and digital signatures of those files on the computer at the IP address. It will show that your affiant downloaded files of child pornography over a period of time from that IP address. It will show what your affiant knows about each of the files that were on, and are expected to be found on the computer at the IP addresses (24.148.156.211).

**BACKGROUND ON OFFENSES AND STATUTORY AUTHORITY**

11. NCGS 14-190.17, known as Second Degree Sexual Exploitation of a Minor makes it unlawful for a person if, knowing the character or content of the material he distributes, transports, exhibits, receives, sells, purchases, exchanges, or solicits material that contains a visual representation of a minor engaged in sexual activity.
12. NCGS 14-190.13, known as Definitions for Certain Offenses Concerning Minors provides the following definitions as applied to NCGS 14-190.14, Displaying Material Harmful to Minors; NCGS 14-190.15, Disseminating or Exhibiting to Minors Harmful Material or Performances; NCGS 14-190.16, First Degree Sexual Exploitation of a Minor; NCGS 14-190.17, Second Degree Sexual Exploitation of a Minor; NCGS 14-190.17A, Third Degree Sexual Exploitation of A Minor; NCGS 14-190.18, Promoting Prostitution of a Minor; and NCGS 14-190.19, Participating in Prostitution of a Minor.

- Harmful to Minors. - That quality of any material or performance that depicts sexually explicit nudity or sexual activity and that, taken as a whole, has the following characteristics: The average adult person applying contemporary community standards would find that the material or performance has a predominant tendency to appeal to a prurient interest of minors in sex; and The average adult person applying contemporary community standards would find that the depiction of sexually explicit nudity or sexual activity in the material or performance is patently offensive to prevailing standards in the adult community concerning what is suitable for minors; and
- The material or performance lacks serious literary, artistic, political, or scientific value for minors.
- Material. - Pictures, drawings, video recordings, films or other visual depictions or representations but not material consisting entirely of written words.
- Minor. - An individual who is less than 18 years old and is not married or judicially

*J. L. Hill* 8/28/12  
Signature: Judicial Official/Date

*C. Brun* 8/28/12  
Signature: Law Enforcement/Date

Additional Affiant: Signature/Date

*W. Hill* 8/28/12  
Additional Affiant: Signature/Date

emancipated.

- Prostitution. - Engaging or offering to engage in sexual activity with or for another in exchange for anything of value.
- Sexual Activity. - Any of the following acts:
  - Masturbation, whether done alone or with another human or an animal.
  - Vaginal, anal, or oral intercourse, whether done with another human or with an animal.
  - Touching, in an act of apparent sexual stimulation or sexual abuse, of the clothed or unclothed genitals, pubic area, or buttocks of another person or the clothed or unclothed breasts of a human female.
  - An act or condition that depicts torture, physical restraint by being fettered or bound, or flagellation of or by a person clad in undergarments or in revealing or bizarre costume.
  - Excretory functions; provided, however, that this sub-subdivision shall not apply to G.S. 14-190.17A.
  - The insertion of any part of a person's body, other than the male sexual organ, or of any object into another person's anus or vagina, except when done as part of a recognized medical procedure.
  - The lascivious exhibition of the genitals or pubic area of any person.
  - Sexually Explicit Nudity. - The showing of: Uncovered, or less than opaquely covered, human genitals, pubic area, or buttocks, or the nipple or any portion of the areola of the human female breast, except as provided in G.S. 14-190.9(b); or
  - Covered human male genitals in a discernibly turgid state.

**BACKGROUND ON MAINTAINING CONTRABAND AND STALENESS ISSUES**

13. Through your affiant's training and experience working cases involving child pornography and through consulting with others experts in the field your affiant has learned and believes that Illegal contraband such as Child Pornography and other materials like Child Erotica and Incest literature is typically collected, stored and distributed by individuals that trade in this type of illegal activity. This type of contraband (Collected Child Pornography) is not "used up" as other Types of contraband can be such as alcohol or drugs. This type of evidence is usually stored in a manner that is easily accessible to the subject viewing these images and is usually stored on a computer's hard drive or some other type of accessible electronic storage media, and may be stored off-site via the use of an Internet Service Provider (ISP). Additionally, email and other data files can typically be stored online, and is usually only limited by the amount of storage space used by the account holder. A small 1 inch square object such as a Secure Digital Storage card can literally hold up to thousands of images. For these reasons contraband of this type can and is usually stored for indefinite amounts of time by the possessors of this illegal contraband. In your affiant's experience and training, and through consultation with other experts, it is known that in many instances these types of files have been found that were stored for years and transferred from and between storage medium and from computer to computer where new computers are obtained by those who collect and trade in child pornography.
14. Collections of child pornography vary in size and in the items based on many factors. Factors which can determine the size and extent of a collection include: living arrangements, economic status, and age. Older offenders and offenders with living arrangements that allow for privacy

2 [Signature] 8/28/12  
Signature: Judicial Official/Date

[Signature] 8/28/12  
Signature: Law Enforcement/Date

\_\_\_\_\_  
Additional Affiant: Signature/Date

[Signature] 8/28/12  
Additional Affiant: Signature/Date

tend to have larger collections.

15. The use of the computer has changed some of these behaviors. Computers allow for an individual to collect items and more easily hide their collection from others. The computer has in essence, allowed the individual who views or collects child pornography to maintain a certain anonymity via the Internet through the use of aliases known as "screen names" or "user names," as well as allowing for the storage of the collection and easy retrieval for viewing. The computer has also made it easy for individuals with similar behaviors to contact, exchange information and validate their behavior amongst each other.

Through the training and experience of this Detective and others listed in this affidavit, I know that individuals who view and or collect child pornography, even if viewing these items from an off-site location, generally maintain the ability to view and store these types of items in their residence or a secure and easily accessible place, especially through the use of a computer and or digital devices for long periods of time. Since child pornography materials are illegal to distribute and possess, initial collection is difficult. Having succeeded in obtaining images, collectors are unlikely to quickly destroy them. Because of their illegality and the imprimatur of severe social stigma such images carry, collectors will want to secret them in secure places, like a private residence. This proposition is not novel in either state or federal court: pedophiles, preferential child molesters, and child pornography collectors maintain their materials for significant periods of time. Computers and other digital media are akin to a filing cabinet or a vault. More germane to this investigation, images and videos of child pornography are hoarded by those who possess it. People who possess these images, rarely, if ever, dispose of it as the sexually explicit material is treated as a prize possession. It acts as a sexual stimulus and provides sexual gratification. Great lengths will be taken to conceal and protect from discovery, theft, and damage their collections of illicit materials. The images and videos of child pornography may be moved around to different parts of the computer or moved to different external media, but it is maintained as a collection for months and years.

#### SEARCH AND SEIZURE OF COMPUTERS AND RELATED MEDIA

16. Based upon your affiant's training and experience and consultations with other law enforcement officers who have been involved in the search of computers and retrieval of data from computer systems, your affiant knows that searching and seizing information from computers often requires law enforcement officers to seize all electronic storage devices (along with related peripherals) to be searched later by a qualified computer expert in a laboratory or other controlled environment. That process is lengthy and time consuming and takes days and even weeks. This is true because computer storage devices (like hard disks, diskettes, tapes, laser disks, CD-ROMs) can store the equivalent of hundreds of thousands of pages of information. Additionally, a suspect may try to conceal criminal evidence; he or she might store it in random order with deceptive file names. While an on-site computer preview is beneficial to get an initial glimpse of some of the items stored on the media, searching authorities will be required to examine all the stored data to determine which particular files are evidence or instrumentalities of a crime. This sorting process can take weeks or months, depending on the volume of data stored, and it would be impractical to attempt this kind of full data search on site. Searching computer systems for criminal evidence is a highly technical process requiring expert skill and a properly controlled environment. The vast array of computer hardware and software available requires even computer experts to specialize

Additional Affiant: Signature/Date

in some systems and applications, so it is often times difficult to know before a search which expert is qualified to analyze the system and its data. In any event, data search protocols are exacting scientific procedures designed to protect the integrity of the evidence and to recover even "hidden," erased, compressed, password-protected, or encrypted files. Since computer evidence is extremely vulnerable to inadvertent or intentional modification or destruction (both from external sources and from destructive code embedded in the system as a "booby trap"), a controlled environment is essential to its complete and accurate analysis. Therefore removal from the premises of some or all computer equipment and related storage media will be required for proper analysis and specific permission by this search and seizure warrant to remove the computer equipment and search it over time at a later date is sought.

**BACKGROUND ON PEER-TO-PEER NETWORKS AND THIS UNDERCOVER OPERATION**

17. Your affiant knows from training and experience that child pornography comes from many sources. Computers have revolutionized the way in which those sources and users interact. Computers have also revolutionized the way in which collectors and users of child pornography can keep their collections. The development of computers and the Internet has greatly changed and added to the way in which child pornography is disseminated, collected, and viewed.
18. Computers have facilitated the ability of child pornography collectors and traders to keep their collections hidden. Photographs and videos that were previously stored in boxes are now traded and collected as digital images that can be stored and maintained on electronic media, such as a digital storage device called a "Micro Secure Digital Card", that is smaller than a postage stamp. Computers and the Internet now aid and serve in the production of child pornography, the distribution of child pornography, the viewing of child pornography, the storage of child pornography and communication between child pornography traders.
19. One of the fast growing areas that facilitates and is used by child pornography collectors and traders is the P2P networks like FastTrack, EDonkey, Bittorrent and the Gnutella Networks. The Peer-to-peer (P2P) Networks have become ideal for traders to openly exchange collections and share those collections. The P2P network has provided a way for traders to have what they feel is an open and anonymous distribution and trading network. This network enables trading on a world-wide basis and with upload and download speeds as if the trader was next door.
20. Your affiant has personally worked undercover P2P investigations and knows from training, research, personal experience in undercover investigations involving P2P networks, and by personal participation in the undercover program the following information.
21. Your affiant knows that computers on the eDonkey and Gnutella networks have software installed on them that facilitate the trading of images. The software, when installed, allows the user to search for pictures, movies and other digital files by entering text as search terms. Some names of the software used include, but are not limited to, eDonkey, BearShare, Frostwire, LimeWire, Shareaza, Morpheus, Gnucleus, Phex and other software clients. Those are software programs that interface with the Gnutella Network and the eDonkey network.
22. P2P file sharing networks, including the Gnutella and eDonkey networks, are frequently used to

J. J. [Signature] 8/28/12  
Signature: Judicial Official/Date

C. [Signature] 8/28/12  
Signature: Law Enforcement/Date

\_\_\_\_\_  
Additional Affiant: Signature/Date

[Signature] 8/28/12 11  
Additional Affiant: Signature/Date

trade digital files of child pornography. These files include both image and movie files.

23. P2P file sharing programs are a standard way to transfer files from one computer system to another while connected to a network, usually the Internet. Peer-to-Peer file sharing programs allow groups of computers using the same file sharing network and protocols to connect directly to each other to share files.
24. Many P2P file sharing networks are designed to allow users to download files and frequently provide enhanced capabilities to reward the sharing of files by providing reduced wait periods, higher user ratings, or other benefits. In some instances, users are not allowed to download files if they are not sharing files. Typically, settings within these programs control sharing thresholds.
25. With a computer connected to the Internet, an individual computer user can make electronic contact with millions of computers around the world. This connection can be made by any number of means, including modem, local area network, wireless and numerous other methods.
26. To access the P2P networks, a user first must purposely seek out P2P software for sharing on the internet and then obtains the P2P software, which can be downloaded from the Internet. This software is used exclusively for the purpose of sharing digital files. When the P2P software is installed on a computer, the user is directed to specify a "shared" folder. All files placed in that user's "shared" folder are available to anyone on the world-wide P2P network for download. Most P2P software gives each user a rating based on the number of files he/she is contributing to the network and on the user's bandwidth and firewall settings. This rating affects the user's ability to download files. The more files a user is sharing, the greater his/her ability is to download files. This rating system is intended to encourage users to "share" their files, thus propagating the P2P network. However, a user is not required to share files to utilize the P2P network.
27. A user obtains files by conducting keyword searches of the P2P network. When a user initially logs onto the P2P network, information about the files that the user is sharing is transmitted to the network. The P2P software then matches files in these file lists to keyword search requests from other users. A user looking to download files simply conducts a keyword search. The results of the keyword search are displayed and the user then purposefully selects file(s) which he/she wants to download. There is no accidental download process. The download of a file is achieved through a direct connection between the computer requesting the file and the computer(s) hosting the file. Once a file has been downloaded, it is stored in the area previously designated by the user and will remain there until moved or deleted. Most of the P2P software applications keep logs of each download event. Frequently, a computer forensic examiner, using these logs, can determine the Internet Protocol ("IP") address from which a particular file was obtained.
28. Thus, a person interested in sharing child pornography with others in the P2P network, need only place those files in his/her "shared" folder(s) or leave the files they download in the shared folder. Those child pornography files are then available to all users of the P2P network for download regardless of their physical location. For instance, a person interested in obtaining child pornography can open the P2P application on his/her computer and conduct a keyword search for files using a term such as "preteen sex." The keyword search would return results of files being shared on the P2P network that match the term "preteen sex." The user can then select files from

J. [Signature] 8/28/12  
Signature: Judicial Official/Date

C. [Signature] 8/28/12  
Signature: Law Enforcement/Date

[Signature] 8/28/12  
Additional Affiant: Signature/Date

[Signature] 8/28/12 12  
Additional Affiant: Signature/Date

the search results and those files can be downloaded directly from the computer(s) sharing those files.

29. One of the advantages of P2P file sharing is that multiple files may be downloaded in parallel. This means that the user can download more than one file at a time. In addition, a user may download parts of one file from more than one source computer at a time thus speeding up the rate at which a single file is downloaded. For example, a user downloading an image file may actually receive parts of the image from multiple computers. The user's computer then reassembles those parts into the single file. This reduces the time it takes to download the file. A P2P file transfer is assisted by reference to an Internet Protocol (IP) address. This address, expressed as four numbers separated by decimal points, is unique to a particular Internet connection during an online session. The IP address provides a unique location making it possible for data to be transferred between computers.
30. Even though the P2P network links together computers all over the world and users can download files, it is not possible for one user to forcefully send or upload a file to another user of the P2P network. The software is designed only to allow files to be downloaded that have been selected. One does not have the ability to send files from his/her computer to another user's computer without their permission or knowledge. Therefore, it is not possible for one user to send or upload child pornography files to another user's computer without his/her computer's active participation.
31. Based on your affiant's training and experience, your affiant also know the following about the operation of the eDonkey file-sharing network:
32. The eDonkey network is also known as the eDonkey2000 file-sharing network, or eD2k. Users of this network can simultaneously provide files to users while downloading files from other users. It is one of the many P2P networks across the globe.
33. The eDonkey network can be accessed by computers running several different client programs. These programs share common protocols for network access and file sharing. The user interface, features and configuration may vary between clients and versions of the same client. During the default installation of an eDonkey client, settings are established which configure the host computer to share files. Depending upon the eDonkey client used, a user may have the ability to reconfigure some of those settings during installation or after the installation has been completed.
34. Typically, a setting establishes the location of one or more directories or (shared) folders whose files are made available for distribution to other eDonkey users.
35. Typically, a setting controls whether or not other users of the network can obtain a list of the files being shared by the host computer by asking for a "browse" of the other computer's file list.
36. Typically, a setting controls whether or not users will be able to share portions of a file while they are in the process of downloading the entire file. This feature increases the efficiency of the network by putting more copies of file segments on the network for distribution.
37. Files on the eDonkey network are uniquely identified using a MD4 root hash of a MD4 hash list

J. Todd Burke 8/28/12

W. Brown 8/29/12 13  
Additional Affiant: Signature/Date

of pre-determined chunks of the file. This treats files with identical content but different names as the same, and files with different contents but the same name as different.

38. The ed2k hash function is a MD4 root hash of a list of MD4 hashes from the chunks of the file, and gives a different result than a simple MD4 hash: The file data is divided into full chunks of 9500 KB (9728000 bytes or nearly 9.28 MB) plus a remainder chunk, and a separate 128-bit MD4 checksum is computed for each. If the file length is an exact multiple of 9500 KB, the remainder zero size chunk is still used at the end of the hash list. The ed2k hash is computed by concatenating the MD4 checksums of all the pieces of the file in order, and hashing the resulting sum using MD4. Although, if the file is composed of a single non-full chunk, its MD4 hash is used with no further modifications. This method of hashing allows the recipient to verify that a hash list corresponds to the original ed2k file hash, without the need to have the data blocks.
39. Files located in a user's shared directory are processed by the P2P client software. As part of this processing, a MD4 root hash value is computed for each file in the user's shared directory.
40. The eDonkey network uses MD4 root hash values to improve network efficiency. Users may receive a selected file from numerous sources by accepting segments of the file from multiple users and then reassembling the complete file on the local computer. The client program succeeds in reassembling the file from different sources only if all the segments came from exact copies of the same file. The network uses MD4 root hash values to ensure exact copies of the same file are used during this process.
41. The MD4 (or Message-Digest Algorithm) is a cryptographic hash function developed by Ronald Rives in 1990. The digest length is 128 bits. The mathematical and statistical probability of a collision is less than a collision of the same DNA in humans.
42. The eDonkey software allows the user to search for pictures, movies and other files by entering descriptive text as search terms. These terms are typically processed by peers based upon the information about the files that had been sent by individual users. Your affiant knows through personal experience the query results presented to the user of the P2P Networks allows the user to select a file from the list of files returned during a query, and then receive that file from other users around the world. Often these users can receive the selected movie from numerous sources at once. The software can balance the network load and recover
43. Entering search terms into an eDonkey client returns a list of files and descriptive information including, in some client software, the associated MD4 root hash values. Your affiant knows from training and personal experience, trial searches, and working undercover cases on the P2P networks that users can find images and movies of child pornography by using these search terms. Some examples of search terms that locate files containing child pornography are "PTHC" (which stands for "Pre-Teen Hard Core"), "babyj", "pedo", "kiddie", "underage", and various terms relating to ages such as "10yo", etc. These search terms typically results in the user being presented with a list of files that include movie and image files that when downloaded and viewed contain child pornography illegal in NC. Your affiant has tested other search terms and results and has been able to successfully identify potential child pornography on the P2P network. Your affiant knows that automated tools can be used to automate the search process for those terms and then used to identify those offering for trade, files that have those terms in them. Your affiant

Additional Affiant: Signature/Date

the database that evidence child pornography from previous investigations by other law enforcement officers.

55. The data acquired from automated tools and undercover operations, including hash value, IP address offering to participate in distribution of a file, name of the file, date and time it was identified by CPS provided from the suspect computer, are all compiled into a user-friendly interface. Your affiant queried CPS for a particular geographic region or jurisdiction – in this case, Rockingham County, NC. Upon selecting an IP address to investigate, the information available of the servers historically about that IP address is generated and sent by CPS for the investigating officer to review.
56. NordicMule is a software tool based on the eMule software program, a publicly available P2P client that operates on the eDonkey network. NordicMule was originally adapted from eMule by The Norway National Criminal Investigative Service for law enforcement purposes. NordicMule was then modified for law enforcement investigations to function within the CPS suite of tools, discussed above. Functionality and features were added to create a software tool that identifies computers offering to share files associated with the exploitation of children on the eDonkey network.
57. NordicMule works by regularly downloading ed2K links (eDonkey magnets) from the CPS servers. Those links are file hashes previously viewed by law enforcement and known to contain depictions of child sexual abuse. As NordicMule receives information from sharing peers about a known file, it attempts to connect and browse that peer. NordicMule identifies what each individual and specific computer is offering for transfer based on IP address. Thus the information acquired is not from multiple sources, but from specific IP addresses at specific dates and times. All information submitted to the CPS servers is the result of individual peer computers responding to a request from NordicMule. Information that is logged to the CPS servers contains the police officer's license number.
58. NordicMule searches for files of known or suspected child pornography and then records the IP addresses of those computers offering to participate in the distribution of known or suspected child pornography. NordicMule reads the publicly available information from computers that are identified as offering child sexual abuse images for distribution. This software reads these reported offers to participate in the sharing of child pornography and reports the IP address, the time, the date, the ED2K MD4 value, the type of software in use, the GUID number (or serial number) of the software, and the filename for each computer offering in a consistent and reliable manner to the undercover servers housed in Florida. Your affiant has validated this software by running identical search terms through manual methods with open source software and the automated system using NordicMule and has confirmed that NordicMule performs in the same way, with matching results as the previous manual investigative techniques used in this operation to date. The automated tools like NordicMule in use in the undercover operation provide beneficial data to undercover officers by automatically identifying and logging IP addresses that are offering to distribute child pornography. The software is distributed and run by thousands of investigators whose software then contributes to a global database. Your affiant has access to those automated logs and can check and see who in and around this jurisdiction (Rockingham County) is participating in and offering child pornography for distribution on the P2P networks.

2. [Signature] 8/28/12

Signature: Law Enforcement/Date

Additional Affiant: Signature/Date

[Signature] 8/28/12 17  
Additional Affiant: Signature/Date

59. Your affiant then selected the option to monitor a particular IP address; in this case 24.148.156.211 on July 20, 2012. When the IP address was online in the eDonkey Network, your affiant's computer would automatically begin to download the files available for trade by the suspect computer. This is done through a law enforcement-only designed system, which your affiant refers to as Undercover Investigative Software (hereinafter referred to as UIS), currently used in state and local Peer-to-Peer P2P file sharing investigations and utilized through the CPS suite of tools. In this particular case it was used to request a download of the files of child pornography from IP address 24.148.156.211. Downloading is a transfer of data from one computer to another. Since your affiant was doing the download, your affiant was receiving data, which was transmitted from another computer. This software is designed by and for law enforcement and only available to law enforcement officers who have attended the appropriate training. Your affiant has done so and conducts that training for others. The UIS is designed to connect directly to one IP address and browse or download from one specific peer at a time using technology to block all other IP addresses from delivering any piece of the file. The UIS is a P2P file sharing client similar to other file sharing which are free and available to the public.
60. Using source code from a free P2P client, the UIS was modified by/for law enforcement to meet the stringent investigative requirements of these cases. For example, the UIS will only download files from a single source – the target IP, while the public version will download from many sources. The UIS thus takes much longer to download files because of the single source limitation. The UIS uses only publicly available P2P options which follow the programming language (protocols) set forth in the public P2P protocol standards. No functionality outside of the publicly available protocols is added, thus eliminating any potential private intrusion on the suspect IP's computer or files. The UIS uses the same code and language that is available to any and all software developers.
61. Upon locating an IP address on the P2P networks that is evidencing Hash Values of known images/videos of child pornography as acquired from the CPS, the IP address is launched into the UIS by the investigator. An automated function of the UIS will attempt to connect to the IP address when it is observed being "on-line" and send a request to browse (i.e. look at and log the information being transmitted -a file list - and/or shown by that IP) and/or download a file from the shared folder of the computer utilizing that IP address. If the connection is not made to either browse or download, the UIS automatically continues to attempt to make a connection with the IP address.
62. If a connection is made with the suspect IP address, the UIS will log the connection. It will also log the browse and/or download in the "logs" – the activity associated with that IP addresses' activity. Files are then downloaded directly into your affiant's computer and segregated from any other evidence. Prior to beginning an investigation using the UIS, your affiant creates a folder structure on the hard drive of your affiant's own computer instructing the UIS to the file path of where to store files that are downloaded and logs that are created. Both the downloaded files themselves as well as the logs will be reported in the appropriate folders created for the target peer IP address by your affiant. The logs identify that a known Hash Value of child pornography has been located, that the download transfer started, that the transfer is in fact processing, and that the transfer of the file is complete. The length of time the download process takes depends on the size of the file and speed of the internet/computer of both your affiant and the target IP's computer.

 Additional Affiant: Signature/Date

  
 Additional Affiant: Signature/Date

- 63. When a file has successfully completed the download process the UIS notifies your affiant electronically. The UIS, being based on P2P program design, ensures that files are obtained directly from the target IP address – assuring a single-source download so that any downloaded file comes directly from the suspect IP address.
- 64. Your Affiant has validated the UIS by conducting investigations manually using publicly available P2P clients and compared the results with the automated UIS process and found the results to be exactly the same.

**SPECIFIC FACTS ABOUT THE IP ADDRESS AND PLACE TO BE SEARCHED**

- 65. The IP address 24.148.156.211 was first logged in the CPS undercover system by the automated tools previously described on 07/20/2012 offering to participate in the distribution of child Pornography known to me. Between 07/20/2012 and 07/26/2012, the IP address 24.148.156.211 was logged, showing a continual pattern of child pornography, by the automated tools. That IP address was logged as offering to participate in the distribution of 3 files of known or suspected child pornography during that period of time. Of those 3 files logged your affiant has seen in prior investigation and can attest that he knows personally that 2 of them are indeed child pornography as defined by the North Carolina General Statutes. The other 1 are known by other officers participating in the undercover operation to be child pornography. The 2 that are known by your affiant can be described as follows:

Ed2k hash value: 60492779477159DD2DA1DB8EE57D6995. File name: "Ptsc Mom & Daughter In Bath.mpg." Detective Bridge has personally seen and knows the file with this digital signature to be a movie file that shows an adult female in a shower with a prepubescent female. Later in the video, the prepubescent female is show masturbating and using a vibrator. The adult female and prepubescent female engage in oral sex, along with other sex acts.

ED2k hash value: A09A2871D9140290887128F7FD593234. File Name: "(Pthc) Russia 10Yo-11Yo Little Brother And Sister-2 - Boy&Girls Fucking\_ Just Posing Or Naked 1.avi". Detective Bridge has personally seen and knows the file with this digital signature to be a video that shows two preteen boys on a bed who get nude and have sex in various positions with a young teen girl. Other clips show nude children playing in the sand and in various sexual positions on a bed.

- 66. Utilizing the UIS, your affiant connected to the IP address 24.148.156.211 on July 21, 2012 between 0550 hrs EDT and 1639 HRS EDT and was able to directly download parts (1153339KB) of 2 video files of the sexual performance of a child. Your affiant has viewed the said file and it is believed to be Child Pornography based upon North Carolina Statutes, and is described as follows:

The file names were Mom & Daughter In Bath.mpg with an ED2k hash value of 60492779477159DD2DA1DB8EE57D6995 Detective Bridge has personally seen and knows the file with this digital signature to be a movie file that shows an adult female in a shower

with a prepubescent female. Later in the video, the prepubescent female is show masturbating and using a vibrator. The adult female and prepubescent female engage in oral sex, along with other sex acts.

67. The partial downloaded version I obtained directly from IP address 24.148.156.211 matches portions of what was described above and is playable and viewable and the viewable portion contains child pornography even though it is a portion of the entire file.
68. The second file name is (Pthc) Russia 10Yo-11Yo Little Brother And Sister-2 - Boy&Girls Fucking\_Just Posing Or Naked 1.avi this video shows two preteen boys on a bed who get nude and have sex in various positions with a young teen girl. Other clips show nude children playing in the sand and in various sexual positions on a bed. The partial downloaded version I obtained directly from IP address 24.148.156.211 matches portions of what was described above and is playable and viewable.
69. The UIS was also able to identify the software in use by that IP address as eMule v0.5 and also a Globally Unique Identification number associated with the computer using his IP address. The GUID associated with this address at the time of the download was 8348EFA7A30EF645C3D806F648766F26. A GUID is assigned to the computer when a file sharing program (such as E-Mule or any other peer-to-peer file sharing platform) is placed onto the computer. This series of numbers and letters is a unique serial number generated for each computer running P2P software around the world. Should the computer be used to access the Internet from a different IP address the GUID will remain the same as it is intrinsic to the computer system in almost all software programs. Further, should the user of the computer update the file sharing program with a newer version, a new GUID will be assigned to the computer for the updated program.
70. Your affiant determined, by using Internet websites that the IP address 24.148.156.211 where child pornography was downloaded from, on the dates listed above was owned by Earth Link as the Internet Service Provider (ISP). On August 7, 2012 I contacted SBI Agent Gerald Thomas who forwarded my request for an administrative subpoena to Cheryl King of the NCSBI. Ms. King filed and administrative subpoena for the IP address 24.148.156.211 for the subscriber information on July 21, 2012 at 0400 GTC. Records below indicate 24.148.156.21 was assigned to the following Earth Link customer for the time request. The following information was returned by Earth Link on August 8, 2011:

Subscriber Name: Roberta Hill  
Service Address: 413 N 2<sup>nd</sup> AVE  
Telephone #: 336-510-7972  
User Name: ms21842365@earthlink.net

71. Time Warner's information described the IP address as issued to the above subscriber from 03/13/2009 to the date of the return of service.

[Signature] 8/18/12  
Signature: Judicial Official/Date

[Signature] 8/28/12  
Signature: Law Enforcement/Date

[Signature]  
Additional Affiant: Signature/Date

[Signature] 8/28/12  
Additional Affiant: Signature/Date

72. In verification of the occupants of 413 N 2<sup>nd</sup> Ave. Your affiant obtained the NC Department of Motor Vehicles Driver License information for Roberta Hill NC OL# 8867196 that information listed her current address as 413 N 2<sup>nd</sup> Ave. It listed her as having a Pontiac Sunfire registered at that address license number PWA6942. Brian David Hill is also listed with the NC Department of Motor Vehicles at this address with a NC OL# 38360908.
73. Based on the foregoing identification by IP address 24.148.156.211 a computer at the location of the IP addresses and physical address listed in this affidavit (24.148.156.211) offered for distribution files with ED2K values that are known or suspected to contain child pornography and sent to your affiant files containing child pornography. A reasonable officer with the proper training and experience could infer and conclude from the logs that the computer at the reported IP addresses recently offered for distribution files with digital signatures of known or suspected child pornography. It could also be inferred with a high degree of certainty, on your affiant's part, that the (Digital Signatures-or hash values) and IP addresses logged were sharing or offering to share those files on the eDonkey Network to other users. Therefore there is probable cause to believe that there is evidence (child pornography files and computer trace evidence listed in this warrant) of a continual pattern in July of 2012 on-going possession and distribution of child pornography through the P2P network (second degree sexual exploitation of a minor) (G.S. 14-190.17) located on the premises of 413 N 2<sup>nd</sup> Ave, Mayodan NC, the Home of Roberta Hill W/F DOB: 05/14/1967 NC OLN: 8867196 and Brian David Hill W/M DOB: 5/26/1990 NC OLN: 38360908, and/or any other person at the residence of at 413 N 2<sup>nd</sup> Ave Mayodan NC to include any vehicles located at that address: specifically registered to Roberta Hill W/F DOB: 05/14/1967 NC OLN: 8867196 that are associated with the home: a 200 Pontiac Sunfire Plate # PWA6942.
74. In your affiant's training and experience with computers your affiant has found that many individuals store their computers (laptops) inside vehicles at the residence and failure to check the vehicles may have result in not finding the computer at the residence. In your affiant's training and experience the lease of the IP address is not always the one who used the computer on the network and frequently others in homes where an IP address is assigned can just as well be the perpetrator. As a result it is imperative to search for all computers in the home and or vehicles in order to determine who actually offered child pornography and distributed child pornography to me. It is highly probable in your affiant's training and experience with this network that a household member of the account identified by Earth Link is active in possession and sharing known or suspected child pornography on the P2P network. A search of that residence where the Cable Internet subscription come back to and the computers and routers at that residence will reveal who at that residence has been involved in active participation in the distribution, possession, receipt, and sharing of child pornography files.

# EXHIBIT C

**STATE OF NORTH CAROLINA**

File No.

Rockingham County

In The General Court Of Justice  
 District  Superior Court Division

**IN THE MATTER OF:**

Name

Roberta Ruth Hill  
Brian David Hill

**INVENTORY OF ITEMS SEIZED  
PURSUANT TO SEARCH**

G.S. 15A-223, 15A-254, -257

I, the undersigned officer, executed a search of:

Person, Premises Or Vehicle Searched

Roberta Ruth Hill / Brian David Hill and the premises and property located at 413 North 2nd Avenue in Mayodan, North Carolina.

Date Of Search

08/28/2012

This search was made pursuant to

- 1. a search warrant issued by: Detective Sergeant Todd Brim/Mayodan PD and Detective Robert Bridge/Reidsville PD
- 2. consent to search given by: Signed by Superior Court Judge L. Todd Burke
- 3. other legal justification for the search: \_\_\_\_\_

The following items were seized:

See Attachment Entitled "Receipt For Evidence And/Or Property" Form

Items Seized Continued:

FILED

2012 AUG 29 P 2: 24

ROCKINGHAM COUNTY, C.S.C.

BY UG

1. I left a copy of this inventory with the person named below, who is:

- a. the owner of the premises searched.
- b. the owner of the vehicle searched.
- c. the person in apparent control of the premises searched.
- d. the person in apparent control of the vehicle searched.
- e. the person from whom the items were taken.

2. As no person was present, I left a copy of this inventory:

- a. in the premises searched, identified on the reverse.
- b. in the vehicle searched, identified on the reverse.

Name And Address Of Person To Whom A Copy Of This Inventory Was Delivered, If Any

The law enforcement agency identified below will hold the seized property subject to court order.

## Reporter intimidated and booted from town council when asking a question

July 10, 2012 by Brian D. Hill (Edit)

Filed under Brian D. Hill's Articles, Building the Police State, USWGO

Author: Brian D. Hill

Note: This is all alleged since only I am coming forth about what happened to me. Of course the RockinghamUpdate reporter was around the area as well but I don't trust RockinghamUpdate as they refused to cover any significant local stories about Mayodan citizens resisting the NDAA 2012 law. I am up for interviews and I promise that everything I say is the truth as it is my duty and responsibility to expose anything that doesn't seem right. I must tell people what happened while it is fresh in my mind although this has been posted days later after the draft has been made as I fear the police are watching my website and are looking for a way to come after me so I am laying low and publish this at least 3 days after the incident. Remember my witness report is just an alleged report since only I have decided to write on this.

Case 1:13-cr-00435-WO Document 84-4 Filed 04/27/15 Page 3 of 11

At around July 9th, 2012 during the Mayodan Town Council meeting, things go from bad to worse at the town council meeting, and all I did as a reporter was ask NC State Senator Phil Berger a question before the chief of police forced me out which is in the video I got recorded. Somehow I recorded audio when the cop forced me out the whole time and even left a remark to have fun with the New World Order multiple times before getting my stuff. There was no audio of the cop intimidating me though but at least I got a recording of part of the whole ordeal.

First while the people were around and leaving the cop told me that when the session closes I am suppose to leave out of there so they can have their private meeting before the meeting is entirely closed. I didn't know all that so I should not have been treated like a criminal. Then of course the cop went further in making sure I never go up to state senator Phil Berger to ask him a question. Then minutes later when I was going to explain to the officer that I have type 1 brittle diabetes, he interrupted me then started telling me that the way I was going up to the state senator with a camera (Like I was in the wrong for that), told me how like those city council meeting videos on TV where someone comes sup quickly to shoot a political official, and acted as though I was coming up to him fast to do something terrible to him or even do something that threatens his life. He said that he knows that I didn't show that I was intending to do that but then he started saying to me that if I go up to the state senator like that again he will push me back or something like that. Basically he was gonna force me back as if I am gonna hurt him or go into a bar without an ID. That was the way he was acting and being close to me, close to my space. Then I told him I promise I won't do that again then he badgered me a little bit more then I said I am sorry and said scouts honor then he backed off. Then when my mom came in to the town hall office

area to check up on me, whenever she left she saw the chief of police watching us and that gave her a bad feeling.

Mayodan Chief of Police and the entire town council is no doubt apart of the New World Order. They know who I am and they know what I stand for so I will have to lay low after the two postings I will make. Please stand for us or we will all hang separately. Even if they aren't 100% in on the New World Order money masters they are apart of this partially by some subsidiary group or pack of corporations that work with the Bilderberg Group. The town of Mayodan is not immune to the garbage and BS of the New World Order and that is a fact as a news reporter I have been in 2-3 years.

**GENERAL AFFIDAVIT FROM BRIAN DAVID HILL REGARDING STATEMENT OF  
FACTS AND WITNESS TESTIMONY ON THE EMULE VIRUS, TROJAN HORSE,  
ROGUE PROGRAMS**

**Location of witness incident:**

State of North Carolina  
County of Rockingham  
Town of Mayodan

**Location of affiant at the time the affidavit was notarized:**

State of Virginia  
County of Henry  
City of Martinsville

BEFORE ME, the undersigned Notary,

\_\_\_\_\_ [name of Notary before whom  
affidavit is sworn], on this \_\_\_\_\_ [day of month] day of \_\_\_\_\_ [month],  
20\_\_\_\_, personally appeared \_\_\_\_\_ [name of  
affiant], known to me to be a credible person and of lawful age, who being by me first duly sworn, on  
\_\_\_\_\_ [his or her] oath, deposes and says:

Around sometime of July 2012, cannot remember the day but the problem may have lasted for anytime between less then one week to two weeks. Also at that time I did no remember using any Anti-virus software on my computer, and had to keep reminding myself to get the software and install on my computer but I cannot remember if I ever did, which means I don't think I used a anti-virus and if I did I would have clearly recalled. I started noticing that emule.exe was running along with three other programs. Conime.exe, ares.exe, and shareaza.exe. I believe the main program that was rogue and was running was emule.exe. It didn't run under the normal programs. This program ran without my consent, and without my knowledge until I discovered the program running in task manager. I had ended the tasks thinking this Trojan was gone but then days later I noticed that the hard drive space on my computer was out at 0k. I decided to open the program location using the task manager. I noticed it appeared to be a portable version of eMule, at least the folder structure looked similar. I clicked on the shared files folder and saw hundreds of files with names I didn't understand. Some of those names from what I could remember said 9yo, pthc, ptsc, and other terms. I assumed it was just some viruses being shared and deleted everything. I had no idea what was shared or that it was something that would get the police after me. Then I tried to sabotage the virus since it took over my computer and made it difficult to fight against. I even recall a bit about calling my grandmother on the phone telling her that I was fighting a virus or Trojan, and that is really all I recall. So I know I had called my grandmother telling her about this Trojan, and took days to put a stop to, if that was even enough as it could have still ran, but I wouldn't know. I believe there may be other Trojans running on the computer too due to the weird programs that were running. I should have restored my computer but did not because I had a lot of data I would have to move off the computer to conduct the restore.

Honestly if I had known that the Trojan horse was sharing something serious that got me in trouble, if I had known earlier what was being shared then I would have reported the incident to the FBI or the NCMEC and sent the sample of this Trojan horse to Anti-Virus companies for examination then have

them forward their findings to the FBI, then the ICAC wouldn't have falsely accused me of child porn. Maybe my life would have been different and I would not be at risk of possible indictment. I had no intent to exploit or harm any child. I would never intend to commit any crime serious enough to ruin my life. I'm not perfect but I ain't some jackal child predator criminal that wants to just go after children, that is not me. I have a dating profile on match.com and may have a possible girlfriend that is also a adult. I was a news reporter for my hobby blog platform titled USWGO Alternative News and it would be unethical and unprofessional for me to be downloading child porn. It's just something that would violate my own standards as a human being, as a news reporter, as a political activist, and as a autistic man. I did the Nullify-NDAA Petition in April to May where I gave it to my two state representatives(Bryan Holloway and Bert Jones), state senator(Phil Berger), to the town of Mayodan, I think the city of Reidsville, the City of Eden, the Rockingham County Sheriff, and I think the Rockingham County Commissioners. My petition drive was condemning government abductions, kidnappings, torture, and secret detention under the NDAA 2012, and even spoke out about this at the Mayodan Town Council repeatedly.

After the police raid I decided to look up what I remember about the Trojan horse. I searched up the file names including emule.exe and found that others had suffered getting this virus and I think I tried to warn them that it could be sharing material that may get them in trouble warning them to report the virus to AV companies so that they can protect themselves from possible prosecution. I discovered from ESET's online website database on viruses that the trojan horse that I received could be the Win32/MoliVampire.A or possible a custom variant, linked below. I did not remember conime.exe until I saw this exact Trojan profile, then I was able to recall that there was a conime.exe file along with them and some other weird file names I cannot recall as it had funny characters so I wouldn't put that into my memory in my head. All I could remember was emule.exe, ares.exe, and shareaza.exe.

You better watch out Brian...We are watching you...Having child porn  
planted on your hard drives and computer was only the beginning and we  
will set you up for violent sex crimes if you don't watch your back...Have  
fun becoming a sex offender...Police won't believe you no matter how much  
evidence you have that you been set up we know some people in the SBI who  
will make sure you are convicted. You will be shut up by being a sex  
criminal. Your friends Alex Jones, Dan, James, Sean, Alex, and others are  
next...BeWare!
